CookBook Network Web Application

User Story1: CookBook Network As a Premium User

As a user, I want to use the "CookBook Network" feature to create new and unique recipes, so that as a user I can share them with other users on the social network. Upon logging in, as a user I will have access to the "CookBook Network " feature, which will allow me to input the ingredients as a user have on hand and receive suggestions for recipes that as a user can create with those ingredients. as a user can also customize the suggestions by specifying my dietary preferences or excluding certain ingredients that as a user don't like or cannot eat.

Acceptance Criteria:
- Premium Users have access to the "CookBook Network" feature.
- Premium Users can input the ingredients they have on hand.
- Premium Users can receive suggestions for recipes based on the input ingredients.
- Premium Users can customize the suggestions by specifying their dietary preferences or excluding certain ingredients.
- Premium Users can create and share their own recipes with other users.

Acceptance Testing:
- Premium User logs in and accesses the "CookBook Network" feature.
- Premium User inputs the ingredients they have on hand.
- Premium User receives suggestions for recipes based on the input ingredients.
- Premium User customizes the suggestions by specifying their dietary preferences or excluding certain ingredients.
- Premium Users create and share their own recipe with other users on the platform.

User Story 2: Upgrade to Premium

As a registered user that has an unpaid plan can upgrade to a premium plan and have Registered premium functionality.

Acceptance criteria:
- Displays the option to upgrade to premium membership
- Displays ability to collect payment information and charge a monthly fee of $1 for upgrading to content creator
- Confirmation email is sent to user that upgrade was successful

Acceptance Testing:

- Login and Click Upgrade to Premium Functionality
- Reminder Email sent out for application

User Story 3: Payment option to get a premium membership
As a user of the Cookbook Network website who has upgraded to the premium membership, as a user I want to be able to use the payment option to access exclusive features and content.

As a premium member, users want to be able to make one-time payments for access to additional content, such as specialized recipe collections and cooking courses.

As a user I also want to be able to save payment information, so that as a user I can easily make future purchases without having to enter my payment details each time.

As a premium member, as a user I want to be able to receive receipts and confirmation emails for all of my purchases, so that as a user I can easily keep track of my spending.

Finally, a user wants to have access to a secure and reliable payment system, with all payment information encrypted and stored securely in the website's database.

Acceptance criteria:
- The payment option is displayed prominently on the website's homepage and/or payment page
- Users can enter payment information and securely store it for future use
- Confirmation emails are sent to users after each purchase
- The payment system is secure and reliable, with all payment information encrypted and stored securely in the website's database

Acceptance Testing:

- Verify that payment information is encrypted when entered
- Verify that payment information is stored securely in the website's database
- Verify that confirmation emails are sent to users after each purchase
- Conduct a security audit of the payment system to ensure it meets industry standards and best practices**.**

User Story 4: Updated Landing Page from Static to Dynamic
As a user, as a user want the landing page to be visually appealing and easy to navigate, with clear calls to action that encourage me to explore the website's content.

Instead of using Static references from the Extensible Markup Language (XML) documents it would be better using a JavaScript

Acceptance Criteria:

- Users can quickly and easily access their saved recipes and personalized recommendations
- The landing page is visually appealing and easy to navigate, with clear calls to action that encourage users to explore the website's content
- The landing page is updated regularly with new and relevant content

Acceptance Testing:
- Verify that the landing page is visually appealing and easy to navigate, with clear calls to action that encourage users to explore the website's content
- Verify that the landing page is updated regularly with new and relevant content
- Conduct user testing to ensure that the landing page is intuitive and easy to use for a variety of users.

User Story 5: Upgraded Recipe Search bar for better user experience

As a user of the Cookbook Network website, as a user I want to be able to use the search bar to find recipes that meet my specific needs and preferences.

As a user, I want to be able to search for recipes based on a variety of criteria, including ingredients, dietary restrictions, cuisine, and cooking time.

As a user I also want to be able to save and bookmark my favorite recipes for easy access in the future.

As a user, I want to be able to refine my search results by sorting them by relevance, rating, or other criteria.

Finally, as a user I want the search bar to be intuitive and easy to use, with relevant suggestions and auto-complete options that help me find the recipes as a user am looking for quickly and easily.

Acceptance criteria:

- The search bar is prominently displayed on the website's homepage and/or recipe page Users can enter search terms and receive relevant search results based on those terms Users can refine their search results by sorting them by relevance, rating, or other criteria Users can save and bookmark their favorite recipes for easy access in the future
- The search bar includes relevant suggestions and auto-complete options to help users find recipes quickly and easily

Acceptance Testing:
- Verify that the search bar is prominently displayed on the website's homepage and/or recipe page
- Verify that users can enter search terms and receive relevant search results based on those terms
- Verify that users can refine their search results by sorting them by relevance, rating, or other criteria
- Verify that users can save and bookmark their favorite recipes for easy access in the future Verify that the search bar includes relevant suggestions and auto-complete options to help users find recipes quickly and easily

User Story 6: Premium User Update/delete Recipe Information

As a user of the Cookbook network website, as a Owner user I want to be able to update or delete my recipe information if as a user make a mistake or if as a user want to change something.

As a user, I want to be able to edit any part of my recipe, including the name, ingredients, cooking instructions, and serving size.

as a user also wants to be able to delete any recipes that as a user no longer want to keep on the website.

As a user, I want to receive a confirmation prompt before any changes are made to my recipe information, to ensure that as a user making the changes intentionally.

Finally, as a user I want the website to keep a record of any changes or deletions that as a user make to my recipe information, so that as a user can easily refer back to them in the future if needed.

Acceptance criteria:
- Users can easily update or delete their recipe information
- Users can edit any part of their recipe, including the name, ingredients, cooking instructions, and serving size
- Users receive a confirmation prompt before any changes are made to their recipe information The website keeps a record of any changes or deletions made to recipe information

Acceptance Testing:
- Verify that users can easily update or delete their recipe information
- Verify that users can edit any part of their recipe, including the name, ingredients, cooking instructions, and serving size
- Verify that users receive a confirmation prompt before any changes are made to their recipe information
- Verify that the website keeps a record of any changes or deletions made to recipe information
- Conduct user testing to ensure that the update/delete feature is intuitive and easy to use for a variety of users.

User Story 7: Edit Profile Information

As a user of the Cookbook Network website, as a user I want to be able to update or delete my user information if as a user need to make any changes or if as a user want to delete my account.

As a user, I want to be able to edit any part of my user information, including my username, email address, and password.

as a user also want to be able to delete my account and all associated user information from the website if as a user choose to do so.

As a user, I want to receive a confirmation prompt before any changes are made to my user information, to ensure that as a user making the changes intentionally.

Finally, as a user I want the website to keep a record of any changes or deletions that as a user make to my user information, so that as a user can easily refer back to them in the future if needed.

Acceptance Criteria:

- Users can easily update or delete their user information
- Users can edit any part of their user information, including username, email address, and password
- Users can delete their account and all associated user information from the website
- Users receive a confirmation prompt before any changes are made to their user information
- The website keeps a record of any changes or deletions made to user information

Acceptance Testing:

- Verify that users can easily update or delete their user information
- Verify that users can edit any part of their user information, including username, email address, and password
- Verify that users can delete their account and all associated user information from the website
- Verify that users receive a confirmation prompt before any changes are made to their user information Verify that the website keeps a record of any changes or deletions made to user information
- Conduct user testing to ensure that the update/delete feature is intuitive and easy to use for a variety of users.

User Story 8: Updated User Paid/Unpaid Page from Static to Dynamic
As a user, I want the home page to be visually appealing and easy to navigate, with clear calls to action that encourage me to explore the website's content.

Instead of using Static references from the Extensible Markup Language (XML) documents it would be better using JavaScript.

Acceptance Criteria:

- Provide user a visual slideshow for users to see popular items they favorited
- Carousel should be engaging enough for users to be familiar with to their favorite recipes

Acceptance Testing:
- Verify that the UI is visually appealing and easy to navigate, with clear calls to action that encourage users to remember the website's content that they favorited
- Verify that the paid/unpaid page is updated regularly with new and relevant content

- Conduct user testing to ensure that the user paid/unpaid page is intuitive and easy to use for a variety of users.
